Scheduled Staff Development Days

Code No. 601.4

Because the Board recognizes the importance of staff development, there will be designated days for staff development during the school year.

In development of the school calendar, the Administration with input from the professional teaching staff will designate the in-service days in a manner which will best serve the district instructional staff needs.

Where the school district bargains collectively with an approved employee organization, the number of in-service days is a mandatory item for negotiations.
